Limewashing.

At the meeting of the Sanitary Board yesterday, Mr Osborne said they were in the middle of December and out of a total of 3,000 tenements only 783 had, been cleansed. The other day a statement was made in the Hongkong Telegraph that no notice was sent to certain owners of tenements reminding them to have their premises lintowashed. That statement was quite correct. Advertisements were inserted in the papers with regard to the western and central districts, but not the eastern listrict, where these particular premises were situated. It was not absolutely necessary, but he thought it was desirable people should be reminded, and therefore he proposed that advertisements should be inserted in the English and Chinese newspapers warping the owners of property in the western division that their premises had to be limewashed and cleansed before the 31st December. Dr Clark seconded, and the motion was carried.

The author who was sometime Follow of Jesus College, Cambridge, and is now Assistant Muster at Harrow School, has simod, to this most useful book, at making a simple selection of the most important factors, or chains of events, in each period, and has treated these in more detail to the exclusion of others which seemed less characteristic of the period. By this means it is designed to awaken interest in the connection of historical events by the process of reasoning, and the full value of history as an educational subject is sought to b realized. The name Salara has always been a source of great trouble to scholars. Its meaning seems to be a medley. But how the word first came to be applied to a form of literal are is not ensily ascertained. When Juvenal steaks of nostri farrago libelli, lie doubtless alludes to the then accepted explanetion of satura as on olla podrida-a jumble of matres or of press and verse. From a rather obscure passage in Livy, is fair to infer that satura meant a simple scope without plot, acted first without, and afterwards with musical accompaniments a play chiefly in the absence of a plot. Livius Andronicus was the first artist who l gave up salurae and, under Greek influence, introduced a regular play :

ARRIVAL OF THE RESCUED THE SHIP TURNED TURTLE.

The Indo-China steamer Yuensang arrived from Manila to day, and included off Lyemoon, Kowloon Rocks, port, and amongst her passongers Captain Pennefather, Messra W. Hunter, J. Jackson, A. Durant, S. Farrell, W. Pugh and A. Blake, the European portion of the crew of the British steamer Hupch, of whose loss we have already had telegraphic information from Manila. So far as can be learned at second hand, it appears that the etcamor had reached to within three hundred miles of Hongkong when, through some unexplained reason; she took a very heavy list. All the boats with one exception were either washed overboard or rendered useless, and as the vessel keeled over the crew took to the rafts. Forty-six of the Chinese ferew immediately, drifted away in their rafts, and these men are still misforce by searchlight, the signals being sing. Captain Pennefather romained on his ship until the following day, and two rafts containing the Europeans and portion of the Chinese crow stood by the ship. The Captain left the vessel as she we hope will be maintained in the next race filled with water, and sought safety on one of the rafts, and having seen the last of the vessel the occupants of the rafts took to the only remaining boat and set sail for one of the Islands. They landed on the Island of Luban, and after some time were sighted It is reliably reported that in the recent by a schooner which took them up to

> SERIOUS FRACAS AT MURRAY PIER.

GERMAN BLUEJACKETS MOB THE POLICE A serious disturbance was occasioned last night at Murray Pier by a large crowd of German bluejackets who attempted: the rescue of one of their comrades from the custody of the Police. The affair assumed a very dangerous appearance, and in the struggle which ensued one of the constables that class win the first prize in this Comfired his revolver into the air to frighten his assailants. Two of the sailors, panied Panger and Hollendoff were avrested, and at the Magistracy to-day, the former was charged with assaulting a British stoker and also with obstructing the Police the performance of their duty. Hollendoff was charged with obstructing the Police. According to the evidence tendered, about 9.20 p.m. the first defendant and the English stoker had a quarrel regarding some matter, regarding which the prosecutor and complainant gave different explanations. At any rate the German thought he was justified in assaulting the Britisher, and he promptly knocked him down and kicked him. At this stage, Commander Boothby, of H.M.S. Endymion, and three other naval officers who had just landed from a sampan, appeared on the scene, and P. C. Baker being attracted by sugines, two mammoth steam-ploughs for the disturbance came from Mursay Pier, to onquire into the matter. Commander. Boothby gave the German in charge for assault, and on the constable seizing his prisoner about fifty German blue ackets who were on the pier closed round him and inaugural address to the London School attempted to take the prisoner from his charge. The naval officers vigorously retaining his hold of the prisoner, was pushed and hustled on to the pier. The constable blew his whistle and an Indian constable who also became mixed up in the meles, ably seconded his white comrade in the whistling line. P. C. Watt. on duty at Pedder

Wharf, hearing the call for assistance, once jumped into a ricksha and came to P. C. Baker's assistance, when his assailants had nearly pushed him over the end of the pier. Baker had drawn his baton and was driving the Germans back. P.C. Watt drew his baton and assisted his comrade in keeping charge of the prisoner. The Germans made a combined rush and almost knocked the constables off the pier. The prisoner almost got away, but Baker knocked him down with his baton. In falling the German pulled the constable down with him. and they struggled together on the ground, the skin of the constable's right hand being broken. Another rush by the Germans was checked by P.C. Watt firing his revolver in the air. The Germans were scared in another rush by the double discharge of the constable's revolver. At this stage, the cutter from the Hausa came alongside pier, and the petty officer in charge cleared away a number of the mon. During tho course of the struggle, the Police patrol pinnace arrived, and P. C. Johnson came up the stairs of the pier, and was immediaately knocked down. P. C. Baker, assisted by the Indian constable and the officers, took the opportunity of getting his prisoner off the pier and along Murray Road. Some of the Germans returned to the attack, but they were kept back from rendering assistance to the prisoner by the naval officers

The first rates for the above Cups were deailed on Saturday last in a light easterly breeze, The course was from the Police Pier at Teim Sha Teui round a mark-boat Meyer's East Buoy, starboard.

The starters in the First class were Maul Marion, Bonito, Chanticleer, Erica, Doreen, Gloria, and Active, and the last named boat received a time allowance of 5 minutes from

Maid Marion got the best of a good start, but was soon passed by Bonito, which maintained the great improvement she has shown this season and went extremely well -so well, that it is quite evident she will be a very hard boat to beat this season. Bonilo was first round each of the marks. but after rounding Meyer's East buoy, Maid Marion, cleverly handled by Hastings, passed her. Meanwhile a fresher breeze brought up the Chanticleer and Active, and a most exciting race home ensued between the four, which all crossed the winning line within a period of seconds. #### A RAT HUNT.

BEWARD OF TWO CENTS PER HEAD. Yesterday, we published the minutes the members of the Sanitary Board with rate as being propagators of bubonic plague. Tropical Medicine on the relationship besisted, the attack upon the constable, but tween rats and plague. Coming as they do

son, and considering that the theory which he propounds, viz., that rats convoy infection, is also held by local medical authoririties, I think the Sanitary Board should take steps to rid the colony as far as possible of this dangerous vermin-not in spasmodic half-hearted spirit, but in a tho roughly systematic manner, so that, oven though we may not, as Dr Manson puts it. contemplate the approach of plague, with equanienty,' we shall at least have the essfaction of knowing that we have enored the warning given us. Dr Manson ays great stress upon the importance o killing the rate before the epidemic is upon us. He says, I would emphatically point out, to be effective these measures must imployed in anticipation. To provi epidemic you must kill the local rats before they are attacked. The prosent, sir, hance, when the mischief has recommenced and what I propose is that we should at once organise a rat hunt, distribute traps broadcast through the city free of charge, and offer a reward for every fat dead or alive. This plan I believe to be the best. because it is hopeless to expect that we can get the rate by any other means than through the occupiers of houses, and the only way in my opinion by which this can se effected is to make it worth the cupiers' while to go to the trouble of catching them. I know that difficulties will cur, and we shall be told rate will be bred or imported for the sake of the reward, but these difficulties must be met as they arise, and I have no doubt that with the assistance of the Captain Superintendent of Police they will melt away like most difficulties do when brought face to face with intelligent determination. We are of course poworless to act of ourselves, having no unds at our disposal, and all we can do is to suggest that Government should give nominate the Vice-President, who proposed effect to our recommendation. I therefore propose: - That Government be asked to authorize the Sanitary Board to purchase and distribute rat traps free of charge to all applicants and to offer a reward of two cents (with power to increase the price if neces-

sary) for every rat dead or alive delivered to the Sanitary Board until further notice. Mr May seconded. Dr Atkinson observed that 600 traps had already been ordered, and it was proposed to give 50 traps to each inspector, and that each inspector should report once a week as to the number of rats killed

THE IMPROVEMENT OF THE CIT PROPOSAL TO FORM A TRUET.

At the meeting of the Sanitary Board yesterday, a motion was submitted that a Sub-Committee of the Board consider and submit recommendations to the Government with regard to the formation of Trust for the improvement of the city.

Mr May said-I beg to move the resolution which stands in my nume and which reads as follows- That a Sub-Committee. of the Roard be appointed, consisting of the Medical Officer of Health, Mr Edward Osborne and one other member to be nominated by the President, to conside and submit recommendations for the formation by Government of a Trust to be endowed with a percentage of the assesse Taxes, and of the premia on Land sales, and with suitable waste lands, or otherwise, and to be charged with the duty, and invested with the power, of carrying out sanitary improvements in the City of Victoria, especially in the matter of the abolition of insanitary areas and of overcrowding.' The article in the Engineer which accompanied this resolution was brought to my notice about fifteen months ago by Mr R. K. Leigh, architect, of this colony, and although I thought the article afforded food for very serious reflection by the Board did not bring it before the Board because. was afraid that perhaps it might act as a trail drawn across the track of the progress the international charges to this colony. of the Insanitary Proporties Bill. Now that | The rates will be : For private wires, 5d per that Bill, thanks to His Excellency the word; for Government wires, 4d per word; Governor, who has taken so great an in- and for press wires, 3d per word. The terest in the sanitary improvement of the company have made these reductions conthe time has come when we should endea- its own office in Adelaide. By this means your to place before the Government some it will deal direct with the public, without recommendations for the further sanitary its business having to pass through the improvement of this city. The Insanitary Properties Bill will effect a great deal, but it requires no sanitarian to see that it cannot and will not effect that radical change for the better which is absolutely essentia

in a great many quarters of the city before trade can rid itself of this dread scourge. the plague, and from the danger of becommic diseases. Hongkong is in its infancy It has a very large future before it, and behaves us mon of the present day to do all we possibly can to make this port a healthy one. Otherwise its development cannot be so large nor its future so brilliant as it ought to be. The subject which is dealt with in the paper which was attached to this resolution is of course a most difficult taining consideration from men who have knowledge of sanitary mattereand large business expucity, to see if some feasible scheme could not be laid before the Government. The Trust which is suggested in this resoluoral Buller a total of over 100,000 men intion would be formed, I should imagine, not necessarily by members of the Sanitary Board only, but would be, or ought to be, a public body composed of the leading mon of the city-intermixed with officials who have the necessary technical knowledge and capacity—and ought to be such body as would command the fullest confidence not only of the Government but of the public. The advantage that such a

mental body would be that its funds would I think, be augmented by subscriptions and donations, perhaps legacies from wealthy at heart. The Government is always re reference to the proposed destruction of garded by the public as a sort of privileged body with a bottomics purse the strings of which it holds very tightly and which is Mr. Osborne said—Amongst the papers | filled with money which it is always loth, on this subject there are some very inter- or somewhat loth, to use for the public benefit. I do not know why this idea has esting remarks made by Dr Manson in his taken hold of the public mind, but such seems to me to be always the esse. A public body such as I should like to see instituted would cortainly bo free from the disadvantiges under which Government someby force of numbers P. C. However, it is the duty of the Sanitary Board to press forward such Se nicasures of reform as will bring light, fresh air, and health into the homes of the many thousands of our fellow-creatures who now struggle for life in loathsome places where darkness, dirt, foul air, and disease preclude all possibility of a healthy existence, and I think that if we steadily persevere in our crusade against these evils we may hope in course of time, it may be years, to effect some real improvement, even though we fail to attain the full men. THE GLORY OF MAN. The crown and glosy of menhood is atrengthy power. All human conquests have been won by it; individual and collective. The earliest righ of decay in man is not usually paid but weakness of some kind of mind or body, or both. This may be the inevitable sequence of salvaned years, or it may, as we all know, show itself at any period of life. But it always means that the sources of strength are falling, as the lessening of the water in a river means a drying up of the spilings and

streams which food it. I said ! sources' of strength, using the plural word. I should have said 'source' of stroughh, for in human beings there is but one. What is H? Terhaps the experience of Mr. David Jones will help us to an answer.

In the summer of 1881, he says, 'I began to feel ill and out of sorts. I was wask and tired, and quite worn out with little exertion. I had a poor appolito, and after eating had pain and weight at the elicat. My secretions were scanly and thick. My back feit sliff, and gave me much pain as I moved about. For three years I suffered like this, being at times better and then worse. I consulted a doctor, who gave me medicines and recommended Turkish baths; but I got no better for any kind of treatment. 'My brother then told me about Mother Seigel's

Carative Syrap, but I h d no faith in advertised medicines. He, however, urged me to take it, and after taking a few dases I experienced so much rollef that I continued with it, and was soon strong and well as over. Since that time I take a doso of this remody when I feel at all siling, and I sets mo right. I have praised Mother Seigel's Syrup to all my friends, many of whom have tried it and bean benefited by it. You can publich this statement as you like. (Signed) David Jones, 1, Daniuse Street, Walton, Liverpool, July

We have room for one more short letter before we try to come at the answer to the question with which we set out ! It is exactly in the same line, and ought to make the results of our inquiry all the more clear and plain.
In the spring of 1889, proceeds the wrier. L. S. Lowis, £10 ..... 102,12

The Tide Table given below has been compiled by the Nautical Almanac Office in London from the result of the analysis of observations taken by means of an automatic tide-recording machine in the Water Police Basin at Tsum Sha Tsul during the years 1887-8-9.

The zero of the table is Low Water Ordinary Spring Tidos, which has been found to be 2 feet below mean sea level. To obtain the depth of water on the tide gauge at the Victoria Naval Yard add 5 ft. 7 in and on the gauge at Lamont Dock, Aberdeen, add 12 ft. B in. to the height given in the table.
